

QUALIFIED CRANE SIGNALER & RIGGER TRAINING COURSE

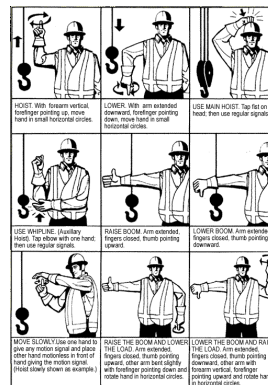

The BX of Dayton is pleased to announce the Qualified Crane Signaler and Rigger Training Course. This course will run for six (6) hours and features both classroom training, hands-on training as well as periodic breaks. The first portion will focus on hand signals and what a Qualified Rigger is required to know. The second portion will focus on when a Signal Person is required and what do they need to know. OSHA is now requiring the training and certification of all persons who are in the position of Signaling and Rigging in construction.

One of the primary goals of BX of Dayton is to strive to bring the construction Industry quality educational programs.

The course has been scheduled as follows:

Rob Shearer with Shearer Safety Services, Instructor
